

4 THINGS TO DO BEFORE OPENING FOR BUSINESS

Starting a business is more than just having a product & selling it. There are a few aspects that you should look at before starting your journey. Here are four things you should consider before running your business.

REGISTER YOUR BUSINESS

The first step to any business is to register your business. Not only does it safeguard your financial and business records, it will help you grow and expand your business in the future.

PRIORITISE CLEANLINESS

Food safety and hygiene has to be taken seriously. There are guidelines and certifications that are established by the authorities. Implement these guidelines in your day to day operations and you will be able to achieve this.

PROTECT YOUR BUSINESS

Mistakes and mishaps may happen at any time in any business. Every entrepreneur needs to ensure that they are protected when this happens. Guard against hazards, viruses and more through food safety guidelines.

COMMUNICATE THROUGH YOUR PRODUCT

Your product is your ambassador. Customers learn about your product's nutritional values, ingredients, manufacturing practices etc. through your label. Follow rules and guidelines enforced by the industry.
